## YOUR TRUSTED BUSINESS PARTNER ABOUT US

Improving business profitability since 1981

**Make moving parcel, cartons, crates and pallets simple and efficient.**

At Dyno, our mission is to keep your products flowing so your business can grow without bottlenecks, waste, or downtime. For more than four decades, we've helped companies turn conveyor systems into a driver of efficiency and profitability.

Our story began in the meat and fruit industries, where damage and downtime weren't an option. Those tough environments taught us how to build conveyors that protect products while keeping operations reliable. Today, that same expertise powers warehousing and distribution, helping businesses move more product, faster, and with lower costs.

With over 40 years of innovation behind us, we've become the trusted conveyor partner across New Zealand, Australia, and beyond. From simple standalone conveyors to fully automated inline systems, customers rely on Dyno for solutions that scale with their growth and deliver lasting results.

Every business faces challenges — wasted labour, fragile products, rising costs, or pressure to expand. We exist to remove those roadblocks so you can achieve more with less.

Talk to us today about your challenges, and let's design a conveyor solution that makes your business faster, leaner, and more profitable.

**Reuben Cornes**  
Managing Director

### YOUR CHALLENGES

## CONVEYOR SOLUTIONS THAT REALLY WORK FOR YOU ARE THESE HOLDING YOU BACK?

Achieving key business objectives, such as on-time delivery, cost efficiency, and scalability, can be significantly impacted by the effectiveness of your internal logistics. Do any of these typical bottlenecks sound like they're holding your operation back from achieving its full potential?

#### ✘ Manual handling slowing you down?

Still relying on forklifts, pallet jacks, or people to move goods? Without conveyors, you're capping your throughput, inviting errors, and exposing staff to fatigue and injuries. Conveyors remove this drag — automating flow, reducing handling, and increasing throughput.

#### ✘ Struggling to meet delivery timeframes?

When internal logistics are clunky, costly delays ripple all the way to your customers. A well-designed conveyor system keeps materials flowing without pause, helping you hit DIFOT (Delivery in-Full On-Time) targets and further improve overall customer satisfaction, consistently.

#### ✘ Labour costs eating your margin?

If you're paying teams to shift boxes instead of focusing on production, packing, or dispatch — that's valuable, labour wasted. Conveyors shift the load efficiently, reducing headcount pressure, turnover, and avoidable downtime across your entire operation.

#### ✘ Running out of space in your facility?

Poor layouts and floor-bound handling systems eat into your valuable usable area. Conveyors allow for smarter use of vertical and horizontal space, enabling much better stock flow, zoning, and scalability — without needing to expand your footprint.

#### ✘ Product damage or safety incidents?

Manually moved goods are more likely to be dropped, crushed, or misrouted. Injuries from lifting and repetitive movement are also a major concern. A modern conveyor system ensures product integrity and safer workflows, especially in high-volume or fragile environments.

#### ✘ Hard to scale when demand shifts?

Seasonal peaks, new product lines, or sudden growth expose the limits of manual systems. Conveyor systems — especially modular ones — adapt fast to increased volumes, reconfigured layouts, or automation upgrades, keeping you agile and responsive.

✔ **Dyno can help you overcome all these challenges,  
and more!**

## OUR COMPREHENSIVE SOLUTIONS PORTFOLIO

### Innovative conveying & automation solutions by Dyno

Transform your operations and profitability with Dyno's comprehensive range of conveyor and automation solutions. As New Zealand's leading conveyor system specialists since 1981, we work alongside you to design, implement, and support fit-for-purpose, scalable systems that improve efficiency, accuracy, and safety across multiple industries and environments.

### INTELLIGENT SYSTEMS INTEGRATION

Seamlessly connect your automation systems with your existing infrastructure and management software. Our integration experts ensure smooth communication between all components, providing complete visibility and control across your operation.

### HIGH-PERFORMANCE CONVEYOR NETWORKS

Our conveyor solutions create optimised product flows that eliminate bottlenecks and maximise throughput in any environment. Each system is engineered to your specific requirements, space constraints, and material handling needs.

### ADVANCED SORTATION TECHNOLOGY

Achieve unprecedented accuracy and speed with automated sortation systems handling diverse product types and volumes. Our solutions scale with your business, from entry-level systems to fully automated high-capacity operations.

### CARTON & PALLET HANDLING SOLUTIONS

Keep your products moving smoothly from receiving to dispatch. Our conveyor systems are designed to handle cartons, crates, and pallets with efficiency and reliability - ensuring faster order fulfilment, reduced manual handling, and a streamlined dispatch operation for businesses of every size.

### DEVANNING, LOADING & UNLOADING SOLUTIONS

Accelerate container, truck, and bulk material handling with specialised equipment that reduces labour requirements and improves throughput at your receiving and dispatch points.

### COMPREHENSIVE LIFECYCLE SUPPORT

Ensure continuous operation with our proactive maintenance services, rapid-response technical support, and extensive spare parts inventory for all types of conveyor and material handling equipment.

## MAKING US PART OF YOUR SOLUTION

### BY PARTNERING WITH DYNO, YOU CAN BE SURE TO GET A CONVEYOR SOLUTION THAT REALLY WORKS FOR YOU.

We spend time on your floor, listening to your current business plan and constraints to better understand your requirements and projections for the future to ensure you are getting a high return on your investment.

Your unique operational requirements are then explored and analysed before a business case and conveyor solution are presented. And that's just the start!

After choosing Dyno, you'll work with our highly skilled team as we work through the design, manufacture, and delivery of your conveyor solution - it's the start of a lifelong relationship, with Dyno committed to providing ongoing support and advice.

**1. ENGAGEMENT** Understanding your current business pain points or constraints along with future business goals and projections.

**2. DISCOVERY** We explore and analyse your unique operational dynamics, ideas, and concepts to create a scope that meets your needs and requirements - now and in the future.

**3. BUSINESS CASE** We provide the information, performance data, and ROI insights you need to build a strong business case for investment and planning.

**4. DELIVERY** Partnership with solution sign-off; design, manufacture, delivery and installation with communication throughout.

**5. LIFETIME OWNERSHIP** Experience the ongoing benefits with continued support from Dyno with the Dyno Lifetime Value™ programme.

## DYNO WORKS WITH MANY INDUSTRIES

WAREHOUSING, DISTRIBUTION & E-COMMERCE | FREIGHT & LOGISTICS | FRUIT | MEDICAL & PHARMACEUTICAL | DAIRY | MEAT | MANUFACTURING | FOOD PROCESSING | AVIATION SECURITY | VEGETABLES

Dyno's conveyor systems are trusted across New Zealand, Australia, and worldwide, solving real-world challenges in major logistics and production settings. From fruit packhouses to pharmaceutical warehouses, our solutions are suited to your specific packaging—be it crates of meat, pallets of dairy products, or cartons of consumer goods. We automate material flow so clients can reduce labour, increase throughput, and hit delivery targets, achieving high ROI.

Every industry we serve benefits from Dyno's deep understanding of moving boxes, crates, and pallets efficiently—all backed by expert design, installation, and support.

## APPLICATIONS WHERE DYNO EXCELS

CARTON & BOX HANDLING | LOOSE ITEM CONVEYING | VERTICAL CONVEYING | FLEXIBLE CONVEYOR SOLUTIONS: TELESCOPIC & EXPANDABLE CONVEYORS | DISPATCH SYSTEMS | EMPTY CARTON HANDLING | AUTOMATED SORTING | PRODUCTION LINE INTEGRATION | PALLET CONVEYING

Dyno's conveyors are engineered to solve specific operational challenges - whether you're moving packed cartons down a production line, unloading pallets from containers, or automating dispatch. Each scenario demands reliability, speed, and smart integration with your team's workflow.

At Dyno, we design systems to maximise ROI through reduced labour, faster throughput, and fewer manual touchpoints. We work where your challenges are: on the floor, at the dock, on the mezzanine, or inside the container.

## CULTIVATING EFFICIENCY

Dyno's Custom Conveyor Solutions for Skybury Farms

"Dyno offered a modern approach and really understood our needs, even for our niche papaya product. They custom built a solution for us, which gave us great flow and movement of fruit in a good time frame. This will allow us to create efficiencies and the growth that we need for the future."

- Candy MacLaughlin  
Skybury

### OVERCOMING UNIQUE CHALLENGES

Skybury Farms, a major red papaya and coffee grower, faced unique packing challenges. Their existing setup struggled to handle the demands of a growing business. Papaya requires highly specialised systems, and off-the-shelf solutions were not suitable for this niche product.

### MODULAR DESIGN FOR GROWTH

The system includes a modular design, allowing for future automation as Skybury expands. It was engineered precisely for papaya, ensuring smooth fruit flow and boosted processing times. Built-in redundancy with twin packing lines provides continuous operation, ensuring reliability even if one line is down.

### A TAILORED APPROACH

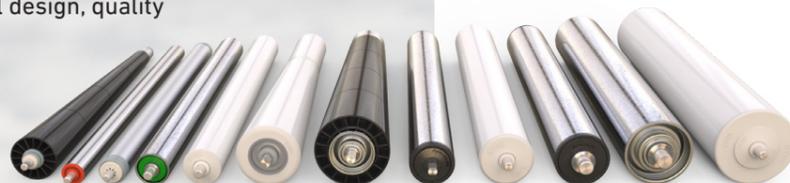

Dyno Conveyors presented a problem-solving and flexible approach, working closely with Skybury to understand their specific needs. This collaboration led to a fully custom-designed conveyor system. This bespoke solution was made to double capacity and introduce efficiencies Skybury needed.

### IMPROVED OPERATIONS

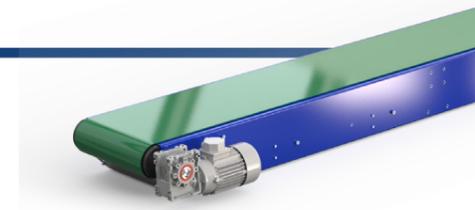

Skybury's facility now manages 200-300 tonnes of papaya daily, significantly reducing manual handling. The partnership with Dyno Conveyors resulted in a smarter, faster operation. Skybury gained confidence in their future growth, considering Dyno their trusted partner for upcoming projects.

From innovative packaging solutions that doubled production speeds to complete warehouse redesigns that streamlined logistics, our case studies demonstrate our commitment to practical design, quality manufacturing and delivering tangible results.

### WHAT IS DYNO LIFETIME VALUE™?

Dyno Lifetime Value™ is our commitment to long-term performance, reliability, and cost efficiency across the full lifecycle of your conveyor system. More than just a purchase, it's an investment in peace of mind, backed by:

- Our industry-leading 5-Year Warranty
- Structured Dyno Care™ maintenance support
- The Dyno Buyback™ Programme to reduce upgrade costs
